

Novaree 2017 Homework

Engineering Ambassadors

Put on your design caps!

We identified the problems for you this time, but engineers have to identify their own problems to solve. **Your homework will be to identify a problem in your daily routine and propose an engineering solution.** Make a flowchart of a daily routine, i.e. getting dressed in the morning before school, and identify wasted time, areas for automation, improvement, or other ideas.

Use the space below to draw your flowchart and identify the engineering opportunities.
Be creative and detailed - have fun with it!
